DEEP LEARNING INDABA \times SOUTH AFRICA 2019

ABOUT US

The Deep Learning Indaba \times is a locally-organised meeting that helps ensure that knowledge and capacity in machine learning are spread more widely across the continent. The Indaba \times is a means with which to experiment with the ways in which we strengthen African machine learning and its local communities, allowing more people to contribute to the conversation around machine learning and artificial intelligence. Indaba \times events are local versions of the Deep Learning Indaba, which will be held this year in Nairobi, Kenya.
